

**Enabling you with
technology in mind**

Regulating Anxiety with Virtual Reality

Evenness is about building experiences with emerging technology aimed at assisting a balance or equity between things. It is about finding ways to even out and balance the feelings you may be having with effective mechanisms that have already been developed and now enhanced and accessible with virtual reality.

Overview

- Supporting NDIS Providers with Emerging Technology
- Safe and User Controlled Environment
- Fostering Self-Awareness
- Engaging Millennials
- Designed with Gamification in mind
- Assisting Gross Motor Skills
- Independent Activity

Sensory Space

The Evenness Sensory Space is designed to recreate a multi-sensory space as an environment where the primary senses are stimulated through the use of sensory based activities in virtual reality. It provides a safe, non-threatening environment, that is aimed at calming or stimulating the senses: fibre optics, bubble tubes, sounds, colour, lava lamp and lighting all in virtual reality. Multi-sensory space is a vital and effective part in the treatment of sensory disorders with children and adults. A sensory space can help develop key life skills including vocalisation, gross motor skills, colour recognition and tracking.

Ryan Kiddle, Senior Manager at The Disability Trust

“When Ken presented us the opportunity to implement a sensory room for our participants in Virtual Reality at a tenth of the price of a physical space, we all had to try it. Once we tried the Evenness Sensory Space in Virtual Reality we were sold. We did some further test with our clients and saw the positive affect it was having to them. We now have the Virtual Reality Evenness set-up at one of our new premises and looking to further collaborate in the academic space on the effectiveness of the VR experience to that of a physical space. Devika does a great job at balancing client needs and market demands, and in doing so would highly recommend Ken and his team after our experience with them.” Source LinkedIn

Evenness Enterprise Packages

Starter Pack \$7,999 +GST

- Virtual Reality Mobile Stand-alone 6-DoF Headset
- Enterprise Master License for Evenness Software Application
